

BERT Error Rate Analyzer Keysight

Overview

J-BERT M8041A High-Performance BERT Generator-Analyzer-Clock Module The M8041A is an instrument module that can be installed into the M9505A 5-slot AXIe Chassis.

Key Takeaways

The Keysight Technologies M8040A-64G-GEN is a highly integrated BERT (Bit Error Rate Tester) for physical layer characterization and compliance testing. With support for PAM-4 and NRZ signals and data rates up to 64 GBaud (corresponds to 128 Gbit/s) it covers all flavors of 200 and.
