

Brunei High-Temperature Temperature Measurement Optical Cable Application Manufacturer

Overview

The paper deals with the overview of fiber optic methods suitable for temperature measurement and monitoring.

Key Takeaways

Fiber optic temperature measurement systems in Brunei can be sourced from international manufacturers like Luna, UPTech SENSING, and COMEM, with local integration and supply support from companies such as Dura Sdn Bhd and Syarikat Perusahaan Zaiba Dan Adik-Adik. International Manufacturers

Luna offers high-definition distributed temperature sensing (DTS) systems using Rayleigh backscatter in optical fibers, providing sub-millimeter spatial resolution and long-range monitoring capabilities. Their solutions include multipoint and distributed temperature sensors suitable for industrial and infrastructure applications. UPTech SENSING manufactures optical fiber-based monitoring equipment for distributed measurement of temperature, strain, and acoustics. Their patented DTS, DTSS, and DAS systems allow for linear measurement over large areas, and they provide full engineering support including installation, commissioning, and SCADA integration. COMEM Group specializes in fiber optic sensors using Gallium Arsenide (GaAs) crystals at the fiber tip, offering highly accurate, non-metallic, and EMI/RFI-immune temperature measurement solutions. These sensors are ideal for harsh industrial environments and high-frequency interference areas.

Local Brunei Suppliers and Integrators

Dura Sdn Bhd is a Brunei-based company providing fiber optic cables and related products. They act as suppliers and distributors for various well-known manufacturers, offering economical solutions for end users, contractors, and system integrators. Syarikat Perusahaan Zaiba Dan Adik-Adik specializes in fiber optic infrastructure implementation, including planning, design, installation, testing, and maintenance. They provide turnkey solutions for fiber optic networks and can support temperature measurement systems by supplying and integrating optical cables and components.

Summary

For temperature measurement optical cable systems in Brunei, international manufacturers like Luna, UPTech SENSING, and COMEM provide advanced fiber optic sensors and DTS solutions. Local companies such as Dura Sdn Bhd and Syarikat Perusahaan Zaiba Dan Adik-Adik can supply, install, and integrate these systems, ensuring full support for industrial, infrastructure, or research applications. This combination allows access to cutting-edge technology with local expertise for deployment and maintenance.
