

CIF price of 50kW power storage cabinet exported from Ethiopia

Overview

Energy Cube 50kW-100kWh C&i ESS integrates photovoltaic inverters and a 100 kWh energy storage system.

Key Takeaways

The CIF price of a 50kW power storage cabinet from Ethiopia depends on the supplier's factory price plus shipping and insurance costs, which must be negotiated directly with exporters.

CIF (Cost, Insurance, and Freight) represents the total cost of goods including:

- Factory or supplier price of the 50kW power storage cabinet
- Shipping costs to the destination port
- Insurance covering the goods during transit This means the CIF price is higher than the factory price alone, as it incorporates transportation and risk coverage.

Estimating Costs

- Supplier Price: Suppliers on platforms like Alibaba offer 50kW energy storage cabinets at competitive factory prices, but exact figures vary depending on brand, battery type (lithium-ion or gel), and system configuration .
- Shipping and Insurance: These costs are negotiated with the supplier and depend on the destination port, shipping method (sea freight is common for large cabinets), and insurance coverage.

- Import Taxes in Ethiopia: Once the CIF price is determined, Ethiopian import duties and taxes apply, including:
 - Customs Duty: based on CIF value
 - Excise Tax: calculated on CIF + Duty
 - Social Welfare Levy: 3% of CIF
 - Surtax: 10% on CIF + Duty + Excise
 - VAT: 15% on CIF + Duty + Excise + Surtax
 - Withholding Tax: 3% of CIF

Practical Steps

- Contact Suppliers Directly: Use B2B marketplaces like Europages or Alibaba to request a quotation for a 50kW cabinet with CIF terms to your port .
- Negotiate Shipping and Insurance: Confirm whether the supplier includes insurance and freight in the quoted CIF price.
- Calculate Total Import Cost: Add Ethiopian import taxes to the CIF price to estimate the total landed cost. By following these steps, you can obtain an accurate CIF price tailored to your destination and import requirements.
