

Data Center Power Distribution Box Circuit Breaker Brand

Overview

ABB Power Distribution for Data Centers ABB power distribution solutions include: Full one-line portfolio including transformers, high, medium and low volta.

Key Takeaways

Leading brands for data center circuit breakers include ABB, Eaton, Schneider Electric, Delta Electronics, and Raritan, offering solutions integrated into PDUs and RPPs for reliable power management. Key Brands and Offerings

ABB provides comprehensive data center electrification solutions, including switchgear, Remote Power Panels (RPPs), busway, and prefabricated modular solutions. Their products are designed for 24/7 operations, ensuring safety, reliability, and efficiency in power distribution systems . ABB circuit breakers are often integrated into PDUs and RPPs to protect equipment from overcurrent and electrical faults. Eaton is a global leader in power management, offering a full range of PDUs and circuit breakers suitable for enterprise, colocation, and hyperscale data centers. Eaton's solutions include advanced monitoring and control features to optimize energy efficiency and uptime . Schneider Electric specializes in energy management and sustainable data center solutions. Their PDUs and circuit breakers provide real-time remote monitoring, user-defined alarms, and overload protection, helping prevent critical IT failures . Delta Electronics offers PDUs with built-in circuit breakers, designed for flexibility, scalability, and energy efficiency. Their products are space-saving and adaptable to future data center reconfigurations . Raritan provides innovative power management solutions, including PDUs with integrated circuit breakers and DCIM software for monitoring and controlling power distribution across data centers .

Circuit Breaker Placement and Design Considerations

Circuit breakers in data centers are typically installed between the main power source and PDUs or RPPs. Some PDUs feature built-in breakers, which can reduce the need for external breakers, though external breakers are still used for additional protection or isolation . Proper placement ensures rapid reset capability, minimizing downtime for servers and critical IT equipment. Selection should consider trip systems, load balancing, and line/load configuration to maintain optimal performance and safety .

Summary

For data center power distribution boxes, ABB, Eaton, Schneider Electric, Delta Electronics, and Raritan are the most recognized brands. Their circuit breakers are designed to protect sensitive IT equipment, support high uptime, and integrate with PDUs and RPPs for efficient power management. When selecting a circuit breaker, consider integration with PDUs, trip characteristics, monitoring capabilities, and rapid reset requirements to ensure reliable operation in a high-demand data center environment.
