

Delivery Time of Hot-Selling Fiber Optic Cable Spiral Tube

Overview

Silicone Spiral Wrap Tube Generally 6-8 weeks lead time. For items with no length listed, please inquire with your desired length. Longest length for a OM3.

Key Takeaways

Typical delivery time for fiber optic cable spiral tubes ranges from 6–8 weeks for non-stock items, with variations depending on product type and supplier.

Lead Time Overview

For silicone spiral wrap tubes, which are commonly used for bundling and protecting fiber optic cables, the standard lead time is 6–8 weeks for non-stock items, and custom sizing may extend this timeframe. These tubes are often made to order, so delivery depends on production schedules and shipping logistics. For spiral steel tube armored fiber optic cables, such as tactical or distribution cables, delivery times can vary based on the number of fibers, pretermination requirements, and whether the product is stocked by distributors. Many suppliers operate through a global network of distributors, which can help reduce lead times for standard configurations, but custom or large-volume orders may require additional production time.

Factors Affecting Delivery

- **Product Type:** Silicone spiral tubes generally have a fixed lead time, while armored fiber optic cables may vary depending on specifications like OM3 plenum, LSZH sheath, or spiral steel tube layers.

- Customization: Custom colors, sizes, or preterminated cables can increase delivery time.
- Supplier Location: International shipping or sourcing from manufacturers in China or Europe may add transit time.
- Stock Availability: Items listed as non-stock or made-to-order will typically require the full lead time, whereas stocked items may ship faster.

Recommendations

- Confirm with Supplier: Contact the supplier or distributor directly to get an accurate delivery estimate for your specific order.
- Plan Ahead: For projects requiring timely installation, consider ordering well in advance, especially for custom or non-stock items.
- Check Local Distributors: Using local distributors can reduce shipping time and provide faster access to technical support . In summary, while 6–8 weeks is a common lead time for non-stock spiral tubes, armored fiber optic cables may vary, and confirming with the supplier is essential to ensure timely delivery.
