

Detailed Price List for Fan Distribution Box Installation

Overview

Fan Powered Boxes Price Guide and Cost Breakdown 2026 Prices for fan powered boxes vary by size, airflow (CFM), installation, and region. This article cover.

Key Takeaways

Installed fan-powered boxes typically cost between \$400 and \$4,500 per unit, depending on type, capacity, controls, and labor. Price Ranges by Box Capacity and Type

- 100–300 CFM: \$400–\$900 per installed unit
 - 300–800 CFM: \$700–\$1,800 per installed unit
 - 800–1,500 CFM: \$1,500–\$4,500 per installed unit
 - Custom or high-capacity units (up to 2,000 CFM): \$1,200–\$3,800 per unit for series/parallel boxes with advanced controls
- Controls and Integration Costs
- Basic thermostat: \$75–\$150 per box
 - Standalone VAV controller: \$250–\$600 per box
 - DDC/BMS integration: \$450–\$1,200 per box
 - Networked BACnet/Modbus controls: \$350–\$900 per box

- Upgrading fan motors or adding advanced controls can increase the unit price by 30%–150% depending on complexity

Labor and Installation

- Typical labor hours: 2–12 hours per box for standard replacement; 10–20+ hours for complex retrofits or ceiling/duct modifications

- Labor cost: \$75–\$125 per hour depending on region and access

- Additional labor considerations: night/weekend work, crane or man-lift usage, and off-peak scheduling can affect total cost

- Permits and incidental materials: \$25–\$250 per box depending on local requirements and project complexity

Materials and Equipment

- Box equipment: \$450–\$1,700 depending on size and type

- Control kits: \$120–\$900

- Ductwork modifications, ceiling tile removal, or reheat coils: \$150–\$1,500 per box

- Disposal of old units: \$75–\$250 per box

- Materials and labor typically account for 70–85% of the total installed cost

Cost-Saving Strategies

- Bundle multiple boxes: Contractors may reduce per-box labor by 15%–35% for multi-unit jobs

- Simpler controls: Opt for zone-level controls instead of full DDC integration (\$250–\$600 vs \$450–\$1,200)

- Prepare clear access: Removing old equipment and providing unobstructed ceilings can save \$100–\$400 per box

- Off-season scheduling: Reduces labor rates and avoids rush premiums

- Standard capacities: Choosing stock 300–600 CFM units instead of custom sizes can save \$200–\$800 per unit

Regional Price Variations

- Urban Northeast/West Coast: 15%–30% higher than Midwest/rural areas

- Rural areas: 5%–15% lower, but may include travel fees

- Regional contingency: Plan 10%–25% when comparing quotes across metro areas

This detailed breakdown allows buyers to compare quotes line-by-line, understand major cost drivers, and implement strategies to reduce the total installed price for fan-powered distribution boxes.
