

Distribution box circuit breaker enclosure

Overview

A distribution box, or DB box, is a circuit breaker enclosure. It is a vital part and central hub of any electrical system. The hub distributes electrical power from a single input source to various circuits throughout a building. Check each product page for other buying options. Whether it's a home, office, or factory, the DB box makes sure power. Distribution boxes, also known as electrical distribution boards or panels, are pivotal components in electrical systems, ensuring the safe and organized distribution of electrical power throughout residential, commercial, and industrial environments. These boxes house various circuit breakers. Whether it's a small electrical breaker box in a residential property or a panel medium voltage cabinet in industrial environments, selecting the right type, size, and configuration is critical. Our distribution boxes are available in a variety of stylish and ergonomic designs to suit any application and our protection windows are designed to protect and shield circuit. PVC breaker distribution boxes are robust electrical enclosures designed to house and protect circuit breakers and associated electrical components.
