

Double-compartment distribution box

Overview

This distribution box features a dual-door design, providing easy access to the internal components, such as circuit breakers, fuses, and wiring. A double door distribution board, also known as a double door consumer unit or distribution box, is an electrical enclosure used to house the electrical wiring and protective devices for a building's electrical system. It is an essential component of the electrical distribution system and serves. This Acti9 distribution board comes with reversible double metal door for door opening. It allows the mounting of modular devices on 20 modules of 18mm. But what exactly is a power distribution box, and why is it so essential in our daily lives?

The DB panel board controls the flow of electricity. Need Quick Assistance?
