

Fiber Optic Patch Cord Reel Price List

Overview

UnitekFiber supplies the best fiber patch cord reels, which is made out of high quality metal or plastic.

Key Takeaways

Fiber optic patch cord reels typically cost between \$50 and \$300, depending on cable type, length, connectors, and reel material. Cost Factors

The price of a fiber optic patch cord reel depends on several key factors:

- Cable Type: Single-mode (9/125 μm) and multi-mode fibers (OM3, OM4, OM5) differ in cost, with single-mode generally being slightly more expensive due to higher precision requirements .
- Length: Longer reels increase the total cost linearly, though bulk orders can reduce the unit price .
- Connectors: LC, SC, MPO/MTP, and APC connectors affect pricing. MPO/MTP connectors require precise alignment and polishing, which adds to the cost .
- Reel Material: Reels can be made of high-impact plastic or metal. Plastic reels are lighter and more portable, while metal reels offer higher durability, slightly increasing the price .

- Additional Features: LSZH jackets, armored cables, ergonomic handles, and friction brakes for tension control can increase the cost .

Typical Price Ranges

- Small plastic reels (up to 50 meters): \$50-\$100
- Medium reels (50-200 meters, single-mode or multi-mode): \$100-\$200
- Large or heavy-duty reels (200+ meters, armored or metal construction): \$200-\$300 or more

Bulk and OEM Pricing

Ordering in bulk or through OEM suppliers can reduce the per-meter cost. Custom labeling or testing reports may add \$30-\$100 per order, but bulk purchases often offset these setup costs .

Summary

A fiber optic patch cord reel's cost varies widely based on fiber type, length, connectors, and reel construction. For most standard applications, expect to pay \$50-\$300 per reel, with higher-end reels offering enhanced durability, specialized connectors, or longer cable lengths. For large-scale deployments, bulk purchasing can significantly reduce costs while maintaining quality standards .
