

Fiber to Switch Interface

Overview

Most modern fiber-enabled network switches require an SFP transceiver module featuring a duplex (two strand) multimode OM3 or duplex single mode OS2 connection with LC connectors. Direct attach cables with pre-terminated SFP connections may also be used. Download the Application. VERSITRON manufactures a wide range of fiber optic switches that provide links for your 10Base, 100Base, 1000Base Gigabit, and 10 Gigabit networks simultaneously. Various port sizes are available ranging from 4 up to 52 ports. We offer solutions that provide seamless transmission and conversion. This chapter describes interface configuration for Fibre Channel interfaces and virtual Fibre Channel interfaces. With AXIS D8308 Fiber Aggregation Switch you can connect multiple Axis devices using fiber midspans over long distances. Plus, optical transmission offers numerous advantages in process, manufacturing and offshore applications, as well as. Moreover, when it comes to bandwidth, no currently available technology is better than single-mode fiber.
