

Height of concealed electrical box from the ground

Overview

The maximum height should be 1800mm (approximately 6 feet) from ground level to allow access without ladders, while the minimum height should be 450mm (approximately 1.5 feet) to minimize the risk of water ingress during floods or firefighting. This guide explores responsible and effective methods for concealing these boxes without compromising electrical integrity or accessibility for service personnel. Any project intended to hide an electrical box must begin with a complete understanding of safety and accessibility mandates imposed by. The National Electric Code (NEC) mandates the installation of outdoor receptacle outlets to reduce the likelihood of shock, which is a significant risk when a user is in direct contact with the earth. The primary rules for outdoor receptacles include ground-fault circuit-interrupter (GFCI). The National Electrical Code provision 110.26 clarifies that electrical boxes must be supplied with at least 3 feet of free space surrounding them for safety measures. 6 of BS 7671:2018+A2:2022 (IET Wiring Regulations 18th Edition). 5m away from the ground, the bottom edge of the lighting and distribution box installed in the walkway of the first floor is 1.48" TO CENTERLINE OF BOX - NOT MORE THAN 5'-0" FROM EXIT.
