

How much does a 12-core fiber optic cable laying frame cost

LoRawan outdoor base station

Overview

12 Core ODF Box price and quote 12-Core Fiber Optic Distribution Frame (ODF), Empty Optical Distribution Frames (ODF) are an integral part of fiber managem.

Key Takeaways

A 12-core fiber optic distribution frame typically costs around US\$300 per piece.Pricing Details

The cost of a 12-core fiber optic cable laying frame, also known as an Optical Distribution Frame (ODF), generally starts at \$300 per unit for standard rack-mount models . Prices can vary depending on:

- Rack size and configuration: Standard 19-inch racks are available in 1U, 2U, 3U, and 4U heights, which may slightly affect the price .
- Material quality: Frames are usually made from cold-rolled steel or aluminum with 1.0–1.2mm thickness, ensuring durability and protection for fiber connections .
- Connector compatibility: Supports SC/APC, SC/UPC, LC, ST, and FC connectors, which may influence cost if pre-installed or customized .
- Certifications and testing: CE, ISO, RoHS, and GS certifications, along with 100% optical and physical testing, are included in the standard price .

- Customization: OEM/ODM services for specific core counts or design features can increase the cost beyond the base \$300 .

Additional Considerations

While the frame itself costs around \$300, the total project cost for laying fiber optic cable includes additional expenses such as:

- Fiber cable materials: A 12-strand fiber cable typically costs about \$0.50 per foot for single-mode fiber, with higher strand counts increasing the price proportionally .
- Installation and labor: Underground or aerial installation can range from \$2.50 to \$8.50 per linear foot, depending on trenching, conduit, and local regulations .
- Permitting and site preparation: Costs vary by region and project complexity, potentially adding thousands of dollars to the overall budget .

Summary

For budgeting purposes, a 12-core fiber optic ODF frame alone costs approximately \$300, but the complete fiber optic deployment including cable, labor, and installation can significantly increase the total project cost depending on distance, installation method, and local conditions .
