

Installation of perimeter fencing for high-voltage distribution boxes

Overview

These documents provide information on the fence materials, details of construction for the fences with and without curbs, typical swing gates and cantilevered gates, man gates and fence isolation sections. Unless indicated otherwise, the normal drive gate should be a. It is recommended that all substations have a perimeter fence surrounding the area where the electrical equipment is housed. As far as security measures go, it is the first line of defense. For the extra layer of protection, competent workers working in the yard can rely on internal fences. The fiberglass wall deters would-be vandals, excludes wildlife, and hides unsightly equipment from neighborhoods. It is typically made of MS Angle Posts, GI Pipes, Chain Link Mesh, or Barbed Wire as per electricity board regulations and safety standards like. At Fibrotech FRP, we believe the last thing guarding high-voltage zones should be a material that conducts electricity or rusts over time. That's why we've engineered a next-generation FRP-based Transformer Fencing System — made entirely from pultruded profiles and gratings, designed for strength. AMICO Security Perimeter Systems deliver the proven perimeter fence solutions for substations providing a formidable barrier to intrusion and ultimately the theft of copper wire.
