

Price List for Composite Fireproof Cable Trays

Overview

Fire Resistant Cable Tray for Sale - 2026 Find top-rated fire resistant cable trays for sale with customizable options. Compare prices, MOQs, and supplier.

Key Takeaways

Fireproof composite cable trays typically range from \$50 to \$200 per meter, depending on material, fire rating, and load capacity.

The cost of fireproof composite cable trays varies based on material type, fire resistance, and mechanical specifications. Fiberglass Reinforced Plastic (FRP) is the most common composite material due to its strength, corrosion resistance, and inherent fire-retardant properties. Standard FRP trays for light to medium-duty applications generally start around \$50-\$80 per meter, while heavy-duty or high fire-rating trays can reach \$150-\$200 per meter. Hybrid designs combining steel or aluminum with fire-retardant coatings may command higher prices due to enhanced structural strength and fire performance.

Factors Affecting Price

- Fire Rating: Trays certified for 60, 90, or 120 minutes of fire resistance under UL, NFPA, or IEC standards are more expensive.
- Load Capacity: Heavier-duty trays designed to support higher cable weights (e.g., 250 kg/m or more) increase cost.

- **Material Quality:** Premium resins, additives, or hybrid coatings improve fire and corrosion resistance but raise the price .
- **Certifications:** ISO 9001, UL, or CE certifications validate quality and compliance, often adding to the cost .
- **Supply Chain and Location:** Manufacturing hubs like China offer competitive base prices, but import duties, shipping, and local assembly can affect landed costs in other regions .

Selection Tips

- Verify fire resistance certification for your project requirements.
- Ensure the load rating exceeds cable weight with a safety margin of 1.5x.
- Consider low smoke and halogen-free (LSZH) options for enclosed or public spaces.
- Evaluate supplier reliability, production capability, and after-sales support .

Conclusion

For budgeting purposes, expect \$50–\$200 per meter for fireproof composite cable trays, with the final price influenced by fire rating, material, load capacity, and supplier location. Comparing suppliers and checking certifications ensures both safety and long-term value .
