

Price of Italian Ladder-Type Cable Trays

Overview

Ladder Type Cable Tray Price List GuideA practical, no-fluff guide to understanding ladder type cable tray pricing—what drives cost, when specs matter most.

Key Takeaways

Italian ladder-type cable trays typically range from €50 to €250 per meter, depending on material, size, and customization. Price Range and Factors

The cost of ladder-type cable trays from Italian manufacturers such as Schiavetti Tekno and FEMI-CZ varies widely based on several factors :

- **Material:** Hot-dip galvanized steel is generally more affordable, while stainless steel (AISI 304/316) or aluminum trays for corrosion-sensitive environments are more expensive.
- **Dimensions:** Standard widths (e.g., 300 mm) are less costly than custom widths or heavy-duty designs for large cable loads.
- **Load Capacity:** Trays designed for high load or long spans between supports require thicker side rails and rungs, increasing the price.
- **Finish and Surface Treatment:** Galvanized, passivated, or powder-coated finishes affect durability and cost.

- **Accessories and Customization:** Elbows, junctions, covers, and supports add to the total system cost. Custom lengths or special certifications (fire resistance, seismic compliance) also increase pricing.

Market Trends

Recent market analysis indicates that raw material costs, particularly steel and aluminum, have driven moderate price increases in Italy's cable tray market. Supply chain constraints and logistics challenges have further influenced procurement costs, with manufacturers emphasizing value-added services and modular systems to maintain efficiency .

Typical Cost Estimates

- Standard hot-dip galvanized ladder tray: €50–€100 per meter
- Stainless steel ladder tray (AISI 304): €120–€200 per meter
- Aluminum or high-load custom trays: €180–€250 per meter
- Accessories (elbows, junctions, covers): €20–€80 per piece depending on size and material For large-scale industrial projects, suppliers often provide bulk pricing or project-based quotations, which can reduce per-meter costs. It is recommended to request a custom quote from Italian manufacturers to account for specific dimensions, load requirements, and environmental conditions .

Conclusion

While prices vary, expect €50–€250 per meter for Italian ladder-type cable trays, with the final cost influenced by material, size, load capacity, and customization. Engaging directly with manufacturers like Schiavetti Tekno or FEMI-CZ ensures compliance with EN and IEC standards and access to technical support for industrial installations .
