

Price of Level 3 Equipment Distribution Box

Overview

Choose from our selection of power distribution boxes in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

The price of a Level 3 Equipment Distribution Box typically ranges from \$40 for standard industrial units to several hundred dollars for high-capacity, explosion-proof, or customized enclosures. Pricing Overview

The cost of a Level 3 distribution box depends on several factors including material, protection rating, size, and customization. Standard industrial boxes made of steel or aluminum generally start around \$40-\$100, while high-end or explosion-proof units designed for hazardous areas can cost \$200-\$500 or more depending on specifications and certifications. Plastic boxes for residential or light commercial use are usually cheaper, ranging from \$10-\$25, but are not suitable for heavy-duty or Level 3 industrial applications.

Factors Affecting Price

- Material: Stainless steel (AISI 304L or 316L) and aluminum boxes are more expensive than plastic due to durability and corrosion resistance.
- Protection Rating: Higher IP ratings (e.g., IP65, IP66, IP68) for waterproof and dustproof enclosures increase cost.

- Customization: Level 3 boxes often require custom internal layouts, mounting options, and integration with control devices, which can significantly raise the price .
 - Certifications: Explosion-proof or ATEX/IECEx certified boxes for hazardous environments are priced higher due to compliance and safety standards .
 - Additional Features: Smart monitoring, surge protection, and energy management capabilities can add to the upfront cost but provide long-term operational savings .
- Typical Applications

Level 3 distribution boxes are used in industrial plants, refineries, chemical facilities, and other high-demand environments where robust protection, high capacity, and compliance with safety standards are critical . The investment in a high-quality box ensures long-term reliability, reduced maintenance, and protection of sensitive equipment. In summary, while a basic industrial distribution box may cost around \$40-\$100, a fully customized, high-capacity Level 3 box with advanced features and certifications can easily reach \$200-\$500 or more, depending on the exact requirements and environmental conditions .
