

Price of Network Cabinets with Stencils

Overview

Browse a wide selection of network cabinets featuring locking doors, adjustable shelves, and cable management.

Key Takeaways

Network cabinets typically range from \$100 to over \$1,000 depending on size and features, while Microsoft Visio network stencils are available for free download. Network Cabinets Pricing

Network cabinets are designed to securely house IT equipment such as switches, routers, patch panels, and servers, and come in various sizes and configurations . Pricing depends on factors like height (measured in rack units, e.g., 6U, 15U), depth, load capacity, and whether they are wall-mounted or free-standing:

- Small wall-mount cabinets (6U-15U): Typically range from \$100 to \$300. These are suitable for home labs or small office setups and often include lockable doors and side panels .
- Medium to large cabinets (20U-42U): Prices range from \$400 to \$1,000+, designed for enterprise or data center environments, with enhanced cable management, airflow control, and higher load capacity .
- Patch cabinets: Specialized cabinets for organizing network connections, often with glass doors and space for patch panels, switches, and routers, generally fall within \$200-\$600 depending on size and features . Additional features such as integrated cooling, grounding, and removable panels can increase the cost.

Network Stencils

For planning and diagramming network layouts, Microsoft Visio stencils provide manufacturer-specific network equipment shapes. These stencils include front and rear views of devices from brands like Cisco, Dell, HP, and IBM, and are drawn to scale for accurate rack diagrams . The stencils are available as a free download from Microsoft and can be used with Visio 2003 or later versions .

Summary

- Physical network cabinets: \$100-\$1,000+, depending on size, type, and features.
- Visio network stencils: Free download from Microsoft for creating detailed rack and data center diagrams. This combination allows you to both purchase the necessary hardware and plan your network layout accurately using professional stencils.
