

SC type fiber optic connector adapter

Overview

SC Adapters are vital optical connectors designed to join two SC-terminated fiber optic cables, ensuring secure and reliable connections.

Key Takeaways

The SC adapter can mate with the SC connector in optical communication. It is made of polymer material and comprises of either precision zirconia ceramic (single mode) or the phosphor bronze (multimode) alignment sleeve. Mouser offers inventory, pricing, & datasheets for SC Adapters Fiber Optic Connectors. With their square shape and push-pull design, SC adapters facilitate easy insertion and removal while maintaining precise fiber core alignment to minimize signal. A fiber optic connector is a mechanical device used to align and join optical fibers, enabling light to pass through with minimal loss. Of the more than a dozen types of fibre-optic connectors available, the four most commonly used today are. Corning offer a wide range of RoHS compliant SC couplings for all applications in Premise and FTTX networks. Single-mode coupling for both PC and APC connections are equipped with.
