

San Marino Data Center Cabinet High Density

Overview

Highest air-cooled density at 100kW, ready for liquid cooling integration to scale beyond 1MW+. Every unit comes with built-in DCIM software for real-time monitoring and predictive control, delivering a smarter, more sustainable data center. AI and HPC are redefining the data. Our DC Series is the Data Center Standard for high-capacity, high-weight load rated, feature rich cabinets. These deployable, seismic and UL-rated cabinets are fully welded, pre-assembled, and come standard with features such as recessed PDU Cavities, and are configurable with or without doors. Thanks to unsurpassed reliability, efficient use of energy, cost-effectiveness, potential for expansion, and sheer power, the modular rack system offers stable data storage along with peace of mind for data center owners who look ahead to the future of their businesses and of the industry as a. The DDC S-Series is a patented, high-performance data center cooling platform designed to meet the demands of AI and HPC workloads. Sample equipment supported. As AI transforms data center architecture, traditional cabinets can no longer support the weight, cooling, and spatial demands of modern GPU-driven systems. The Martin MHD-Series High Density Server Cabinet is purpose-built for these new requirements—delivering exceptional structural strength. We design innovative high density storage solutions and systems with mobilized shelving units, lockers, static shelving and more. From the innovative offices and technology spaces of San Jose to the Silicon Valley and the universities of the San Francisco Bay Area, and out to the many manufacturing. Legrand is a global provider of data center server and network cabinets, providing fully enclosed racks with side panels, front and rear doors, and roofs.
