

Telecom replaces copper cable with fiber optic cable

Overview

Across telecommunications, data centers, smart infrastructure, transportation, and industrial automation, fiber optic cables are rapidly replacing copper cables. This shift is not driven by hype or short-term technology trends. The business case for replacing copper networks with fiber optics has never been stronger. Instead, it reflects fundamental changes in how the world generates. The first R, REDUCTION, is closely linked to fibre optics, which consumes less energy than copper, breaks down less and is much faster. What happens to a consumer's service when a copper network gets replaced?

When copper is retired, a. That's why Deutsche Telekom is investing billions of euros every year in building out its fiber-optic network – so people everywhere in Germany can benefit from fast internet connections and high bandwidths. Fast, reliable, high-speed internet is an important prerequisite for meeting the digital.
