

Tunisian cable tray manufacturing plant

Overview

Sati Italia S.p.A. company profile and history Sati Tunisia's goal is to satisfy market requests of North Africa, addressed to cable trays and trunking syst.

Key Takeaways

Tunisian cable tray factories produce a wide range of cable management systems including ladder, perforated, PVC, mild steel, and stainless steel cable trays for industrial, commercial, and specialized applications.

Tunisian manufacturers produce various types of cable trays to meet different electrical distribution needs:

- **Ladder Cable Trays:** Designed for heavy-duty applications, providing strong support for large bundles of cables and allowing easy ventilation.
 - **Perforated Cable Trays:** Feature holes for better air circulation and heat dissipation, suitable for medium to light cable loads.
 - **PVC Cable Trays:** Non-metallic trays resistant to corrosion and suitable for environments with high humidity or chemical exposure.
 - **Mild Steel and Stainless Steel Cable Trays:** Offer durability and resistance to mechanical stress, corrosion, and extreme temperatures, often used in industrial plants, power generation, and marine environments.
- Materials and Special Features

Factories in Tunisia use high-quality materials such as 316L stainless steel and CuNiFer alloys for corrosion resistance, heat insulation, and modular adaptability . Some trays are flame retardant (B1 class) and comply with international standards like IEC 60092-3 and EN 13501-1, ensuring safety in high-risk environments . Special coatings and modular designs allow trays to withstand high humidity, temperature fluctuations, and even seismic activity .

Applications

Tunisian cable trays are used across multiple sectors:

- **Industrial and Power Plants:** Supporting heavy electrical cables and ensuring reliable energy distribution.
- **Commercial Buildings:** Organizing wiring in offices, residential complexes, and student dormitories.
- **Marine and Offshore Projects:** Saltwater-resistant trays for ships and offshore facilities.
- **Specialized Infrastructure:** Heat-insulated and polymer-coated trays for high-humidity or high-temperature environments .

Customization and Quality

Manufacturers in Tunisia offer customized solutions to meet client-specific requirements, including tailored dimensions, materials, and coatings. Facilities are equipped with modern machinery and follow stringent quality checks from raw material procurement to final packaging, ensuring durability, safety, and compliance with international standards . In summary, Tunisian cable tray factories produce a diverse range of cable management systems designed for durability, safety, and adaptability across industrial, commercial, and specialized applications, with options for customization and compliance with international quality standards.
