

Warranty for server room cold aisle IP67

Overview

Warranty: This Vertiv™ product is warranted to be free of defects in material and workmanship for a period of (3) Year from Assembly or (42) months from Shipment. More frequently, data centers are using hot and/or cold aisle cooling containment solutions to help with managing airflow, eliminating hot spots and improving energy efficiency. It involves the use of physical barriers or enclosure at the end of server aisles to separate hot and cold airflows. To. all your data center cooling needs. This contained cold air helps prevent hot spots and runs. Aisle containment ceilings, walls and end of row doors are designed to help maintain optimal operating temperature in server rooms and data centres in order to lower data centre energy demands and save on energy costs.
