

Which company makes the best Swedish-style steel cable trays

Overview

We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation.

Key Takeaways

Nordic Wire Tray, SFSP, and SILTEC are among the top manufacturers of high-quality Swedish-style steel cable trays, offering durable, customizable, and corrosion-resistant solutions. Nordic Wire Tray (NWT)

Nordic Wire Tray is a leading provider of premium cable trays designed for demanding environments. They offer stainless steel wire trays with extensive customization options, including bending, cutting, and surface treatments to suit unique project requirements. Their X-Tray system features longest spacing between support brackets, reducing installation time and cost, and is designed for easy, fast, and high-quality installation. NWT emphasizes flexibility, adaptability, and high-quality standards, making it ideal for industrial and commercial projects .

SFSP

SFSP manufactures steel cable trays in compliance with BS EN 10130/10131/10051, BS EN 61537:2023, and NEMA standards, ensuring international quality and safety. They offer pre-galvanized, hot-dip galvanized, stainless steel, and aluminum trays in various thicknesses (1.0 mm to 2.0 mm), suitable for heavy-duty applications. SFSP trays are designed for speedy installation, cost efficiency, and robust assembly, making them a reliable choice for large-scale electrical and cabling projects .

SILTEC

SILTEC produces first-class stainless steel cable trays that prevent corrosion and provide high resistance. Their trays are available in multiple sizes, with options for special dimensions on request. SILTEC's patented cable trays with locks allow fast cable installation and easy maintenance, while compact and heavy-duty types cater to both light and heavy cabling tasks. Their products are particularly well-suited for building installations and projects requiring long-term durability .

Key Considerations

When choosing a Swedish-style steel cable tray manufacturer, consider:

- Material quality: Stainless steel or hot-dip galvanized for corrosion resistance.
- Customization: Ability to produce trays in non-standard sizes or with special features.
- Ease of installation: Fewer fasteners, longer support spacing, and modular designs.
- Compliance: Adherence to international standards like BS EN, NEMA, or CENELEC.
- Project support: Availability of technical assistance, fast delivery, and warranty options. For high-quality Swedish-style steel cable trays, Nordic Wire Tray, SFSP, and SILTEC are excellent choices, offering a combination of durability, flexibility, and compliance with international standards.
